Unisex Mammut Zephir Altitude rockclimbing harness

New in bag Mammut Zephir Altitude rockclimbing harness Unisex size small. Climbing harness for mountain and ski tours.

Extremely lightweight alpine harness with minimal packing volume for high-altitude and ski tours: the Zephir Altitude. Fully equipped technical harness with single-click buckle for easy putting on/taking off, even when wearing skis or crampons. Patented Split-Webbing technology in the hip belt in combination with HTPE webbing in the leg loop construction ensures a modern design and exceptional comfort. Large ventilation openings for maximum breathability. Gear loops and the drop seat buckle are positioned to allow the Zephir Altitude to be easily combined with a backpack and hip belt.

Although it has never been used, it was purchased a few years ago. Still got a good 3 years left of life (or more, at your own risks of course). Priced accordingly.
