## Darbouka Bongo

Genuine Darbouka purchased in Tunisia and combined with the hembra (larger drum) of a Matador Bongo from Latin Percussion.

It's old but in decent condition. Both heads are synthetic, giving it a higher pitch that's ideal for playing alongside amplified instruments rather than acoustic. I used it back in the day to play with DJs at raves and bars because its pitch was so clear and sharp, it didn't even need an amp. I might have some spare heads I can include for a small extra cost.

**Price: \$ 50.00**

Phone: 418-956-4046
