## Lois & Clark Carbon Fibre Cello

Purchased from recording artist and professional cellist from Edmonton. Lois & Clark carbon fibre cellos are highest quality yet very playable for novice to professional musicians. Have performed with this instrument with several orchestras but due to injury in left arm, its time to pass along to another aspiring or professional musician. Comes with a fibreglass cello case with wheels, as well as professional bow valued at \$800. Recently had an electric hook up installed so it can be played acoustically or electrically. Amplifier still in box, recently purchased at Fiddle & Sticks (selling separately). Aside from the cello's wonderful sound, it being carbon fibre- made, it better tolerates the great winter weather north of 60.

Serious inquiries only please, asking \$12K
