Huion Kamvas 22 Plus drawing tablet

Kamvas 22 Plus drawing tablet for digital art. The drawing area is 21.5" diagonally with a resolution of 1920x1080 (FHD). The pen has 8192 levels of pressure sensitivity and has good responsiveness to pressure. If you're tired of squinting at a small 13" screen while drawing and want to go even bigger, this might be the tablet for you!

Bought May 2025 and used a little bit, but selling because it's really too big for my desk space and I want to buy a slightly smaller one. Currently I have it mounted to a monitor arm and it doubles as a second monitor, but I'm sure someone else could make better use of it.

Comes with:

- pen, pen holder, and spare nibs
- two drawing gloves (keeps oils from your hands getting in the glass)
- Huion's 3-in-1 cable (used for power supply and hooking up to the computer if you don't have a USB-C port) as well as what looks to be a USB extender that I found and you can have
- Huion's USB-C to USB-C cable, if you have a Thunderbolt or DP Alt Mode port
- an adjustable stand (I will put the stand on for you)

See here for more info: <https://store.huion.com/ca/products/kamvas-22-series?vid=868>

See here for the driver and user manual: <https://www.huion.com/download>

Please note the price is fixed and I won't be accepting any offers. I think you know if you want a 22-inch drawing tablet or not, haha.

Contact me for more details or to arrange pickup.

Price: \$ 300.00
