Need a real mechanic for hire.

Need an alternator & a CV boots axle shaft on the front passenger side & a new battery. I have all the parts. Willing to pay \$300 as I know it's a 2 hour job. It's way less than that. I seen my real mechanic buddy put that same axle shaft on in literally 10 minutes starting from the time he took off the tire and the alternator is nothing too. I just don't have the tools anymore. It's on a 2000 Ford focus station wagon. My number is 446-1491. No wannabes or yoyos.

Need it done in my driveway as I have no insurance.

Talk more afterwards on an oil change & maybe a tune up if all goes well.

Phone: 780-237-0119
